

An intricately detailed home at Asset Legacy

This apartment at Asset Legacy, Trivandrum has been carefully designed with inputs from the home owners. The family comprising of a couple and their son has been completely involved with the Asset Interiors team during the process of design of their dream home. Smart home features have been included as per the wishes of our customer.

Living Room

The living room has a cosy and delicate vibe to it. With a grey accent wall, white drapes and an intricately designed white CNC wall partition the living room provides a perfect setting to wind down for the family members. The living room boasts of a customized TV unit complete with spot light-lit shelves to store accessories and also to function as a display for memorabilia.

Kitchen

A contemporary kitchen with all modern amenities is designed for the home. A touch controlled angular chimney, matching hob, white modular shelves, washing machine are a few features of this fully functional kitchen.

Bedrooms

All three bedrooms in the apartment have a color scheme of their own. The head boards, wardrobes, mirrors and other fittings are all matched to the theme of each bedroom.

One of the bedrooms has a soothing pastel color as its theme, the wardrobe has a pleasing cherry blossom tree as artwork inspired from the sakura season of Japan.

CLIENT SPEAKS

Mr. Vishnu & Family

It was a lifetime dream for us to settle in Trivandrum. From our initial interaction with Mr. Shine, we were pleased with the way of interaction from the sales team. Later he introduced us to the interior designing department Mr. Thambi and Mr. Arun. They forwarded their interior design of our flat. Being a civil engineer, the civil designs were modified by me. Accordingly, they reverted with their 2D and 3D drawings and were forwarded for implementation. They started the work according to the modified designs. Due to unexpected pandemic attack, the team were forced to pause their work for 3-4 months. During these months, my son (Electronics Engg. student) was discussing the idea of making a bedroom smart. The site engineer was very helpful on implementation of the same.

The work progress were updated to us regularly by the site engineer. The interior along with the project department [Smt. Indu Rajesh, Mr. Nishanth, Mr. Manoj] has helped us to fulfil our dream.

Best Regards,

Vishnu

Proud owners of Asset Legacy ,12 B

Team behind design and execution: Mr Thambi P Bose, Ms. Sukanya , and Mr. Sivaprasad.
